

Arizona Report of Public Agency Performance on Participation and Performance of Children with Disabilities on Statewide Assessments

Note: This report has three sections: 3a. AYP; 3b. Participation; and 3c. Proficiency

Indicator 3a: Adequate Yearly Progress (AYP) Rate

Percent of PEAs that have a disability subgroup that meets the State's minimum "n" size meeting the State's AYP objectives for progress for the disability subgroup.

Measurement

Percent = the (# of PEAs meeting the State's AYP objectives for progress for the disability subgroup (children with IEPs)) ÷ the (total # of PEAs that have a disability subgroup that meets the State's minimum "n" size) times 100.

Explanation of Indicator

The No Child Left Behind Act (NCLB) requires that education agencies meet performance objectives for their population as a whole and for all identified subgroups. Students with disabilities who have an IEP are one of the identified subgroups. There are a number of factors that are considered for AYP—two of the most important are the percent of participation of students with disabilities on the State assessment and the percent of students with disabilities taking the State test that meet or exceed the established passing score. Other factors, such as student improvement and statistic confidence intervals, are also factors. The subject areas assessed for SY 2006-2007 for AYP were reading and math.

The calculations for AYP differ from the required calculations for reporting under the Individuals with Disabilities Act in subtle but significant ways. The reader is cautioned not to compare the results reported for AYP to the results reported for IDEA purposes on other aspects of Indicator 3.

All data are from the 2006-2007 school year. The minimum "n" size in Arizona is 40 students.

State Targets for SY 2006-2007:

23.5% of PEAs meet overall AYP for students with disabilities (SWD)
16.5% of PEAs meet Reading AYP for SWD
19.0% of PEAs meet Math AYP for SWD

State Results for SY 2006-2007:

18.25% of PEAs met overall AYP for students with disabilities (SWD)
22.1% of PEAs met AYP for reading for SWD
29.38% of PEAs met AYP for math for SWD

Arizona Report of Public Agency Performance on Participation and Performance of Children with Disabilities on Statewide Assessments

Note: This report has three sections: 3a. AYP; 3b. Participation; and 3c. Proficiency

Indicator 3b: Participation Rate

Participation rate for students with disabilities (SWD) against grade level standards and alternate achievement standards.

Measurement

Participation rate = # of SWD in the assessed grades who were assessed with the regular assessment with no accommodations or with standard accommodations + # of SWD in the assessed grades who were assessed with alternate achievement standards ÷ # of SWD in the assessed grades.

Explanation of Indicator

The State regular assessment is the AIMS and the State assessment against alternate achievement standards is the AIMS-A.

The data in this report include the percent of students with disabilities who took the AIMS or AIMS-A in the spring of 2007 (FFY 2006) with no accommodations or using only standard accommodations. For FFY 2006, the requirements under the IDEA and the NCLB on how to account for students who took the AIMS with non-standard accommodations (modifications that invalidate the test results) are different from one another; therefore, the participation rates reported for each methodology differ. Under the requirements for NCLB, students using modifications were classified as not having participated in the assessment. Under IDEA, these students were classified as having taken the test but were assigned a "Falls Far Below" score for performance.

All data are from the 2006-2007 school year. Data are not reported for a PEA when the PEA had fewer than 10 students with disabilities enrolled in the grades assessed. In these instances, the data are not reported to ensure confidentiality.

State Targets for SY 2006-2007: Math: 95% Participation
 Reading: 95% Participation

State Results for SY 2006-2007: Math: 97% Participation

**Arizona Report of Public Agency Performance on
Participation and Performance of Children with Disabilities on Statewide Assessments**

Note: This report has three sections: 3a. AYP; 3b. Participation; and 3c. Proficiency

Indicator 3c: Proficiency Rate

Proficiency rate for students with disabilities (SWD) against grade level standards and alternate achievement standards.

Measurement

Proficiency rate = # of SWD in the assessed grades who are proficient or above as measured by the regular assessment with no accommodations or with standard accommodations + # of SWD in the assessed grades who are proficient or above as measured against alternate achievement standards ÷ # of SWD in the assessed grades.

Explanation of Indicator

The State regular assessment is the AIMS and the State assessment against alternate achievement standards is the AIMS-A. The results of the tests are reported in the following manner:

- Exceeds the standards (E);
- Meets the standards (M);
- Approaches the standards (A), and;
- Falls far below the standards (F).

The data in this report include the percent of students with disabilities who took the AIMS or AIMS-A in the spring of 2007 (FFY 2006) who met or exceeded the standards with no accommodations or using only standard accommodations. The U.S. Department of Education requires that the State targets for students with disabilities are set at the same rate as the targets for all students under the NCLB.

For FFY 2006, the requirements under the IDEA and the NCLB on how to account for students who took the AIMS with non-standard accommodations (modifications that invalidate the test results) are different from one another; therefore, the proficiency rates reported for each methodology differ. Under the requirements for NCLB, students using modifications were classified as not having participated in the assessment. Under IDEA, these students were classified as having taken the test but were assigned a "Falls Far Below" score for performance.

All data are from the 2006-2007 school year. Data are not reported for a PEA when the PEA had fewer than 10 students with disabilities enrolled in the grades assessed. In these instances, the data are not reported to ensure confidentiality.

State Targets for SY 2006-2007:	Math:	35.0% Meets or Exceeds
	Reading:	40.0% Meets or Exceeds

State Averages for SY 2006-2007:	Math:	30.5% Met or Exceeded
	Reading:	29.0% Met or Exceeded
